

Welcome...

to FlexTech Hose Solutions Ltd.

The name is probably new to you but our team has in excess of 120 years experience in the production and supply of hose products. This means that we are able to accurately assess ongoing market trends and stock the right products to meet a wide variety of customers hose requirements.

Our aim is to ensure that we carry out a practical analysis of your particular application and then advise a cost effective hose solution. In doing so we will help you to resolve even the most difficult of technical problems by supplying the right hoses on time when they are needed.

Time is of the essence in our production oriented world and we understand how difficult it can be to find a professional, reliable hose supplier. The objective is to plan ahead and get it right first time by developing a good working relationship with suppliers who have your best interests at heart.

For this reason FlexTech will always give you a realistic and practical lead-in time even for products which are non standard and perhaps harder to find. We specialise in bespoke hoses for difficult applications and will be pleased to discuss your specific hose program, stock holding and other associated requirements.

FlexTech will also support you with best hose installation and usage practices thereby ensuring that your business is aware of all relevant aspects of hose related legislation and associated health and safety requirements.

Our mission is to ensure that **FlexTECH** becomes recognised as the most comprehensive hose and hose assemblies solutions provider in the UK whilst simultaneously offering a service that is always on-time, every time.

Our Capabilities...

We all need help at times.....

In our world fitness for purpose is everything, you may have a good hose but in the wrong application....disaster!!

For this reason our prime objective is to help **you** - the all important customer - to make the right choice and then follow it through.

We are here to help you from start to finish with sound advice, design suggestions, product development for specific hose applications or just to point you in the right direction.

In short - FlexTech is different; our team are all specialists in their own fields. We have 120 years combined experience in the hose and engineering industry and this expertise is here to provide you with the best product solution every time.

We can help you by:-

- Making life easier and solving your hose problems
- Advising on hose material, quality, application and safety issues
- Designing hose assemblies for your requirements
- Etching hose collars with identification / test details
- Using our hose refurbishment facility to help reduce costs
- Troubleshoot specific hose situations
- Advising on stock holding and call-off
- Arranging site hose surveys
- Carrying out site hose audits

And many other ways too numerous to list here - *so just call us!*

Standards

The **FlexTECH** commitment to providing high quality products is reflected in our **ISO 9001:2008 Quality Management System**. The stringent quality control procedures in place ensure that integrity is maintained at every stage of production.

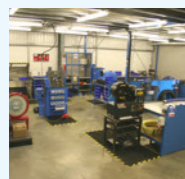

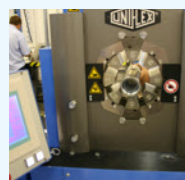

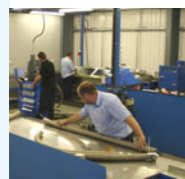

We utilise high grade materials and components in the manufacture of our hose products. Machined and cast fittings include Aluminium, Brass, Copper, Gunmetal, Stainless Steel (304,316,321) and Titanium with full material certification available upon request.

Flextech products are certified to **EN 10204:2004** and meet **API, BS, DIN, FDA, ISO** and many other international standards.

Hose Production

FlexTECH operate a modern, safe & efficient purpose built hose production facility. We have the benefit of three streamlined hose assembly lines:

- PTFE smooth and convoluted bore hose assemblies.
- Hygienic silicone and rubber hose assemblies.
- **Gates** Hydraulic hose assemblies.

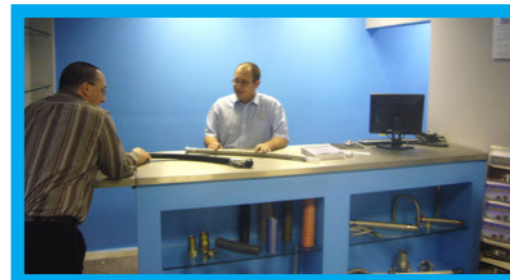

In-House Testing

FlexTECH take the safety of its customers, staff and general public very seriously. Hoses under high pressure can fail in service causing injury or death if not correctly assembled.

For this reason our destructive and non-destructive testing procedures ensure the integrity of each hose under test.

FlexTech 'state of the art' automated pressure testing equipment is capable of operating bespoke test cycles with recorded test results to ensure safety and peace of mind.

Trade Counter Service

Our trade counter is open daily between 8:00am and 5:00pm Monday to Friday to cater for those unforeseen emergencies.

You will find our counter staff very friendly, knowledgeable and helpful so if you need technical advice, want to look before you buy or just wait for your hoses to be manufactured then look no further.

Why not ask for details of our emergency weekend and out of hours service.
