## Pathfinder Reels

A heavy duty fully automatic spring rewind hose reel fitted with the revolutionary automatic travelling hose guide arm and constructed in heavy gauge gloss white powder coated steel for general applications or 304 stainless steel for food, pharmaceutical and chemical applications.

The unique travelling hose guide arm function allows the reel to work perfectly when mounted in high positions, out of harms way.

It offers easy installation with no need for post installation adjustments, covers various mounting positions and the balanced clock spring produces enough torque to displace the weight of the automatic hose guide arm.

Ideally suited for washdown, air, water, steam, oil and fuel applications.

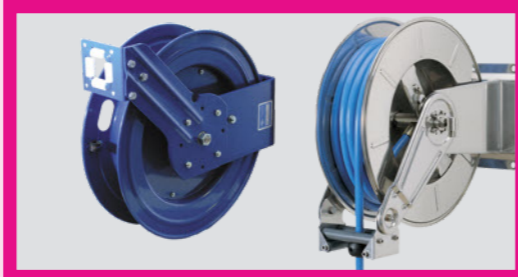

- Maximum working pressures - from 300 to 5000 psi
- Inlet and outlet size range:- 1/4", 3/8" and 1/2" BSP
- Hose capacity from 10 to 20 Metres
- Comes with a 2 year warranty

## Spring Rewind Reels

A heavy duty fully automatic spring rewind hose reel available in powder coated steel or 304 stainless steel options with fixed or swivel mounts.

Ideally suited for washdown, air, water, steam and fuel applications.

- Maximum working pressures - from 300 to 3000 psi
- Inlet and outlet size range:- 3/8", 1/2" and 3/4" BSP
- Hose capacity from 7 to 30 Metres

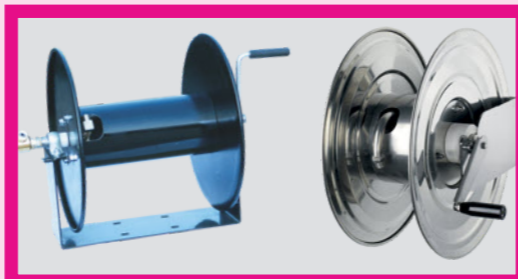

## Hand Cranked Reels

A heavy duty manually cranked hose reel available in powder coated steel or 304 stainless steel options with fixed or swivel mounts.

Ideally suited for washdown, air, water, steam and fuel applications

- Maximum working pressures - from 300 to 3000 psi
- Inlet and outlet size range:- 3/8", 1/2", 3/4", 1", 1 1/4", 1 1/2" and 2" BSP
- Hose capacity from 15 to 180 Metres

**FlexTECH** offer a full range of hose reels & accessories which aid compliance with current health and safety legislation and provide a safer working environment. The installation of FlexTech hose reels will help to reduce trip hazards and maintenance costs whilst improving the safety of the work place for employees.

The working pressure of each reel supplied by FlexTech is limited only by the maximum working pressure of the hose installed upon it.

Our hose reels are available in stainless steel, powder coated steel and polypropylene and widely used in the food and drink, dairy, breweries, chemical, marine, engineering, automotive and agricultural industries.

## High Visibility Reels

A heavy duty highly visible, high capacity fully automatic spring rewind hose reel constructed from heavy gauge steel and finished in a durable, high gloss powder coated paint.

Ideally suited for air, water, oil and diesel applications.

- Maximum working pressures - from 700 to 2700 psi
- Inlet and outlet size range:- 3/8", 1/2", 3/4" and 1" BSP
- Hose capacity from 10 to 40 Metres

## Retracta Reels

A medium duty fully automatic spring rewind hose reel constructed from high impact polypropylene for all-purpose corrosion free durability. Options include: food, air, diesel and water qualities.

Ideally suited for washdown, air, water, steam and fuel applications.

- Maximum working pressures - from 100 to 3000 psi
- Inlet and outlet size range:- 1/4", 3/8" and 1/2" BSP
- Hose capacity from 10 to 20 Metres

## Compact Reels

A robust polypropylene impact resistant fully automatic spring rewind hose reel fitted with hose and pivoting mounting brackets.

Ideally suited for light duty compressed air and water applications.

- Maximum working pressures - from 150 to 300 psi
- Inlet and outlet size range:- 1/4, 3/8", 1/2" BSP
- Hose capacity from 5 to 20 Metres

## Hose Reel Accessories

**FlexTECH** also provide a comprehensive range of accessories and spare parts which allow your reels to be repaired as part of a planned maintenance program. These parts include:-

- Swivel rotating unions used on side of reel inlet / outlet
- Roller guides to enable hose to be coiled efficiently
- Mounting brackets giving options for fixed and swivel mounts
- Colour coded trigger operated guns in brass and stainless steel
